ABOUT INVICTUS TT460

With TT460, Invictus brings to a new dimension the refined allure characterizing the Italian shipyard boats since ever. The stretched and essential lines are the distinctive ones for Invictus hulls, widely appreciated since the launch of the first GT280. Balanced and precise signs, entrusting the dynamic effect to the dialogue between smooth and muscular surfaces and carefully calibrated openings. Invictus TT460 is designed as something more than a simple craft: the meaning of the entire project, from the onboard spaces concept to the choice of materials and optionals, is to create the perfect place for a day of sharing, enjoyment and levity. Key Features Engine IPS 2x800 HP Volvo (under warranty) Dynamic Positioning System Starlink High Performance Volvo autopilot MCX13 gyroscope Garmin...
