ABOUT B130

The B130 is a true steel ocean-going yacht designed for uncompromised long-range cruising. Her full-displacement steel hull and aluminum superstructure deliver outstanding safety, stability, and confidence on transoceanic passages. Generous interior volumes, a full-beam owner's suite, and flexible accommodation layouts provide the comfort and space of a much larger superyacht. Expansive deck areas are designed for privacy, relaxation, and effortless entertaining. Engineered for reliability and true autonomy, the B130 is built for owners who think beyond horizons. Built to go further.
